Engineering Signatories

This information sheet contains a list of people with experience in automotive design and standards who have indicated that they are available for consultation. They are familiar with vehicle construction requirements in NSW and, for a fee, they will provide advice to owners and vehicle constructors, undertake technical assessments and issue engineering certificates. However, in publishing this list, the Roads and Traffic Authority does not endorse their services nor does it take any responsibility for the quality of their work. Vehicle constructors and owners intending to engage the services of an engineering signatory, should establish the signatory's experience for the proposed scope of work and the fee arrangements before work is commenced. It is also advisable to ascertain whether the signatory carries "*Professional Indemnity Insurance*".

An engineering signatory who certifies a motor vehicle as to its construction or modification will:

- personally inspect the vehicle;
- ensure that the scope and any construction or modification complies with the requirements of the Road Transport (Vehicle Registration) Regulation 1998 and the Australian Design Rules;
- Issue an engineering certificate in the form specified under the Engineering Certificate System (ECS) (see sample overleaf).

Note: Only an engineering certificate issued by a signatory who is listed will be acceptable to the Roads and Traffic Authority (RTA) for the purposes of vehicle registration.

Engineering signatories included in the ECS are full members of the engineering organisations recognised by the RTA for this purpose, namely:

- The Institution of Engineers, Australia (IE Aust);
- The Society of Automotive Engineers, Australia (SAE-A) - **Automotive Signatory Group**.

Other information sheets published by the Authority cover the circumstances under which a vehicle constructor or owner may require the services of an engineering signatory. In brief, owners are required to obtain an engineering certificate from a recognised engineering signatory, when performing any modification to a vehicle, which is safety related and affects the continuing compliance of the vehicle with the Road Transport (Vehicle Registration) Regulation 1998 and the Australian Design Rules.

A list of these signatories is attached to this information sheet.

Sample format required for Engineering Certificates (front page shown)

Engineering Certificate No: JBS

1234

MP

3 Character identification code assigned by the RTA to each signatory (usually the signatory's initials).

Number of Certificate (4 digit field allocated).

Either;
MP for *Modified Production, or*
IC for *Individually Constructed, or*
IP for *Imported Vehicle*
as appropriate.

LETTERHEAD WITH ADDRESS AND TELEPHONE NUMBER

ENGINEERING CERTIFICATE NUMBER

JBS.1234.MP

I have personally examined the vehicle described below. I hereby certify that the particulars shown in this certificate are correct and that the vehicle it describes is *(cross-out whichever is not applicable)*:

- A Modified Production Vehicle
- An Individually Constructed Vehicle
- An Imported Vehicle

In the affected areas, the vehicle meets the requirements of the Road Transport (Vehicle Registration) Regulation 1998, as amended.

John Smith 27/09/2000

John Smith
MIE (Aust)

The certificate shall include details of the Engineering Signatory's professional affiliation(s).

MODIFIED PRODUCTION VEHICLE

Owners Name : J. Citizen
Address : 25 Turbo St, Carcity NSW 2750
Registration Number : ABC.123
Vehicle Make & Model : Holden / HZ
Body Type : 4 Door Sedan
Month/Year of Manufacture : 5/1978
VIN/Chassis Number : CHASSIS4567
Engine Number : ENGINE123
Engine Capacity : 5766ml
Unladen Mass : 1430kg
GVM/GCM : N/A
Odometer Reading : 186572km
Affected Australian Design Rules : 7, 9, 23, 24, 27A, 28 & 31

These details show the modifications made to the vehicle when the certificate is issued. This serves to identify additional vehicle modifications made after the certificate is finalised.

Vehicle Components

a) Engine	:	Replaced
b) Transmission & Driveline	:	Transmission replaced
c) Front Suspension & Axles	:	Original
d) Rear Suspension & Axles	:	Rear axle replaced
e) Braking System	:	Modified
f) Steering System	:	Original
g) Wheels & Tyres	:	Original
h) Body/Chassis	:	Original
i) Seating	:	Previously modified (see JBS.0123.MP)

Note
It is essential to provide additional information that adequately describes the modifications in detail and includes statements indicating the basis for acceptance and demonstration of ADR compliance.

SCOPE OF CERTIFICATION

A replacement 5766ml V8 Holden engine and Ford 4 speed manual transmission have been fitted to this vehicle. The rear axle assembly (including the drum brakes) has also been replaced with those items from a Ford XW GT Falcon. Refer to the attached notes for additional details of these modifications and their compliance with the affected ADRs.
